

2six2

26.2 Miles? Bring it On!

Only one percent of the world's population has endured the body jolting, mind blowing ride known as running a full marathon. Few people know the bittersweet triumph of running 26.2 miles on their own two feet, but this training season, we are encouraging Team Ewing runners to go for the full marathon gold and become a part of the elite few.

We have created a new club around Ewingland called "2six2". If you sign up to run the marathon and successfully cross the finish line, your name will go on a special plaque housed at the Home Office. Though notoriety is treasured, the real award will come in your strengthened mental game, your fit physique and the out-of-this-world feeling of accomplishing something so great.

So what are you waiting for?

Sign up for the full marathon today.
